

# PERSISTENT TECHNOLOGY

Transformative Human-Centered Solutions

## CORE COMPETENCIES

### EMERGING TECHNOLOGY

- VR/XR Development
- Artificial Intelligence AI/ML/NLP
- Post Quantum Cryptography

### HEALTHCARE IT

- Enterprise IT
- Medical Imaging & Neurotechnology
- DevSecOps & ONF
- COTS/GOTS Integration
- Data as a Service
- Data Quality
- Software Quality Assurance
- Network Infrastructure Management
- Interoperability
- AWS Government Cloud
- Systems Engineering
- User Adoption
- Strategic Planning
- Change Management
- Instructional System Design
- LMS Development & Documentation
- Custom App Development
- Defense Medical Logistics
- Transformation Program Management

## CUSTOM SOLUTIONS

### REFLECT XR

#### Reflect XR

Expand Your Reality, Explore Your Mind

Reflect XR is a Patient-Centered Immersive Art Therapy Platform based on clinical studies of Art Therapy as a proven modality in treating patients with Traumatic Brain Injury (TBI). Virtual Reality

(VR) provides therapists with an accessible, standardized telehealth platform to expand treatment beyond the clinic. It offers patients and caregivers a space that nurtures self-awareness and emotional processing through creative expression. Outcomes include improved self-awareness, reduced psychological symptoms, and an enriched quality of life for patients and their loved ones.

### SERVICENOW IT ASSET & SERVICE MANAGEMENT

Capabilities incorporate industry best practices including ITIL and ISO standards to enable modernized asset and service management processes, improved lifecycle management, and seamless integration to reduce technical risks while enhancing customer experience.

## PROJECTS

### DEFENSE MEDICAL LOGISTIC STANDARD SUPPORT

Our support of multiple Supply Chain systems includes DMLSS and LogiCole, providing documentation, training, modernization, and testing, ensuring reliability for DoD and VA Medical Logistics. LogiCole a central IT solution for agile, global operations, to integrate existing systems with financials, auditing, EHR, VA enhancements, mobile tech, cloud hosting, cybersecurity.

### STANDARDS & COTS INTEGRATION PLATFORM

SCIP, an enterprise platform, connects the VA, federal agencies, & programs for clinical data sharing, supporting 190K users, exchanging 100M clinic records annually, and ensuring reliability for 25K medical professionals.

### VETERANS INTEGRATION & FEDERATION ENTERPRISE PLATFORM

Agile API development and API gateway management enable secure, high-performance access to EHRM and VistA data. We foster interoperability and resolve commercial device format and interface issues, ensuring standards, governance, & data integration with COTS and non-COTS solutions. HL7 standards provide communication between VA healthcare systems.

### DIGITAL TRANSFORMATION SUPPORT SERVICES

Using emerging technologies, PTI works with Agile development and IT modernization for Customs & Border Patrol systems, including application development & automated testing.

### COMMUNITY CARE DEVSECOPS SUPPORT

PTI readies CCPL Sub-Products through DevSecOps and SAFe. Our Agile teams develop, test, integrate, and maintain shippable products for scalability and reliability, aligned with VA guidelines.
